Paternal line: Trent Bridge TBRFM100 is a rare recessive free son of the highly-proven Australian sire Macquarie Y408. He has elite genomic EBVs for MS and all three indexes, and a unique sire stack that is outcross to most US genetics and is from the outcross Takeda maternal line of TF Kensei!

Maternal line: Her granddam F57 is free of all recessive traits and checks all the boxes for phenotype and genotype. The family is known for high Japanese marbling genetics, carcass size, maternal traits, solid front pasture cows, and the the highest milk EBV in the breed is from this family.
