### 7TH ANNUAL PRODUCTION SALE August 31, 2024 • 1:00pm • At The Farm

**SELLING 70 HEAD - 30 RAMS AND 40 EWES**

We have placed careful selection pressure on the following traits over the years, often retaining and using sons from our very best ewe families that consistently excel, to multiply the kind of sheep that work well for us and our customers:

- **IMPROVED MUSCLING**  
We are in the meat business, so we want a top quality end product for the consumer.
- **STRUCTURAL CORRECTNESS**  
In the feet, legs, hip, top line and shoulder as well as rib capacity and base-width.
- **MATERNAL TRAITS**  
Such as udder quality, milking ability, lambing ease, vigor, attentiveness, prolificacy, and docility for success in the lambing barn.
- **LONGEVITY**  
Our flock is noted for longevity which takes healthy sheep that are built to last.
- **MODERATE MATURE SIZE**  
For easy maintenance on grass and efficient feed conversion to milk and meat.

*Our customers have reported excellent success using our rams on hair sheep to boost muscling, growth and hybrid vigor!*
