Glenbrook Farm

About Us

Matt started raising commercial Katahdin sheep in 2008 on his parent's farm. In 2009, he sold that flock and bought a registered flock of Katahdins and moved them to the current farm location. In 2013, he joined the National Sheep Improvement Program which provides estimated breeding values to select animals using data. In 2018, he added a small flock of White Dorpers from Paul Lewis in Oregon. He also added a few Romanovs that same year. In 2022, we added Texels from the West Virginia University flock dispersal which brings our current ewe flock to approximately 130 Katahdins, 30 White Dorpers, 20 Romanovs, 20 Texels and 150 commercial ewes.

Our goal as a farm is to use data and visual appraisal to breed sheep that excel in commercial sheep production. For any questions please contact Matt Nolt at **(717) 419-1980**.

Thank you for your interest in our sheep!

Matt and Katie Nolt

NSIP EBV and Indexes Descriptions

BWT: Birth Weight EBV (kg) estimates direct genetic effects on weight at birth. Positive selection is anticipated to increase birth weight and have correlated positive effects on early lamb survival, especially with twins and triplets. Negative selection is anticipated to reduce birth weight and lambing difficulty associated with oversize lambs, especially in singles.

WWT: Weaning Weight EBV (kg) provides an estimate of preweaning growth potential and will likely receive positive selection emphasis in most flocks.

PWWT: Postweaning Weight EBV (kg) combines information on preweaning and postweaning growth to predict genetic merit for postweaning weight at 120 days. Positive selection is expected to favor rapid growth to typical market ages.

NLB: Number of Lambs Born EBV evaluates genetic potential for prolificacy. Expressed as numbers of lambs born per ewe lambing. Ewes with +0.10 are expected to have an average of 0.10 more lambs at each lambing than average ewes and their daughters are expected to have an average of 0.05 more lambs at each lambing compare to daughters of average ewes.

NLW: Number of Lambs Weaned EBV evaluates combined ewe effects on prolificacy and lamb survival to weaning. Expressed as number of lambs weaned per ewe lambing. Ewes with 0.10 are expected to wean an average of 0.10 more lambs at each lambing than average ewes, and their daughters are expected to wean an average of 0.05.

MWWT: Maternal Weaning Weight EBV (kg) estimates the genetic effects of the ewe on the weaning weight of her lambs (a measure of the ewe's merit for mothering ability). Mainly reflects genetic differences in ewe milk production. Ewes whose lambs grow faster than predicted are assumed to be better milk producers, those that grow slower are assumed to produce less milk.

Scrapie Genotype Resistance Descriptions

RR — Resistant **QR** — Moderately Susceptible **QQ** — Highly Susceptible

Scrotal Circumference: Rams with larger scrotal circumference tend to product more semen of greater viability and tend to sire daughters that reach puberty earlier and ovulate more eggs.

This is one of the sires I purchased from WVU with the rest of my Texel flock. He has good growth and great carcass quality. Here are his carcass EBVs and index: Pfat -2.4 Pemd .9 SRC 113.9 Carcass+ 139.1 . Whether you're looking to improve carcass quality for direct market lambs or eye appeal for the ethnic buyers, Texels will get it done. We have semen available to sell from this ram. This sire will be sold on this sale as lot# 48.

GLENBROOK 666: Katahdin Sire Ram

Registration: 134853 **Genotype:** QR **Date of Birth:** 2/6/2017

Scrotal Circumference: 34 cm as of 6/13/2023

BWT	WWT	PWWT	NLB	NLW	MWWT
.4	3.1	5.2	-17	0	1.7

This is a homegrown sire out of one of my original ewes and a non-NSIP ram that I bought in for new genetics. He has no NSIP background but with over 430 progeny in 5 different NSIP flocks, he is one of the best proven rams out there. He is wide and deep which gives him a lot of capacity for forage and lambs in his daughters. With a low NLB & NLW, high MWWT and solid growth, his offspring are perfect for flocks that don't want bottle lambs. We have semen available to sell from this ram.

ELR 21400: Katahdin 50% Sire Ram

Registration: x182907 **Genotype:** QR **Date of Birth:** 10/12/2021

NSIP ID: 6401562021ELR400

Scrotal Circumference: 34 cm as of 6/22/24

BWT	WWT	PWWT	NLB	NLW	MWWT
.2	3	5.3	39	41	1.6

There is no other Katahdin currently in NSIP with this combination of high traits! This ram is off the charts! He is sired by Ewe Lamb Right's (ELR) WRI 19065, the General , who was the highest selling ram at the 2019 Virginia Tech ram sale. The dam is ELR's Quad Queen herself, a Katahdin ewe of unknown origin or age that had 22 lambs in 8 years recorded in NSIP. Whether you want to improve growth or maternal traits, this sire's offspring will do it.

GLENBROOK 23027: Katahdin Sire Ram

Registration: pending **Genotype:** QR **Date of Birth:** 1/27/2023

This is a medium framed, easy fleshing ram that is very well put together. His dam has produced 11 lambs, raised 9, in the last 4 years including lot# 59 and GB 22149, the second highest selling ram at our 2022 sale. His sire GB 20223 stamped his lambs with heavy bone, fast growth, and early maturing. This sire will be sold on this sale as lot# 51.

GLENBROOK 23038: Katahdin 75% Sire Ram

Registration: pending **Genotype:** QR **Date of Birth:** 1/28/2023

Birth Type: 2

Weight: 183 lbs. as of 6/22/24

Sire: ELR 21400

Dam: GLENBROOK 18136

BWT	WWT	PWWT	NLB	NLW	MWWT
.19	3.25	4.85	18	27	1.11

This is a heavy boned, deep bodied ram which should produce awesome replacement ewes. He is in the top 5% WWT, top 2% for NLW and top 20% for MWWT! This sire will be sold on this sale as lot# 52.

GLENBROOK 23151: Katahdin 75% Sire Ram

Registration: pending **Genotype:** QR **Date of Birth:** 2/11/2023

Birth Type: 2

Weight: 203 lbs. as of 6/22/24

Sire: ELR 21079

Dam: GLENBROOK 22129

NSIP ID: 6401052023GB3151

BWT	WWT	PWWT	NLB	NLW	MWWT
.42	3.33	6.83	29	28	1.52

This ram has it all! If you're looking to add size, growth and maternal traits, don't miss this one. He is in the top 4% WWT, top 2% PWWT, top 2% NLW and top 4% MWWT! Rams like this don't come around often. This sire will be sold on this sale as lot# 53.

FETT 274J: Romanov Sire Ram

Registration: U16744 **Genotype:** QR **Date of Birth:** 3/27/2021

Birth Type: 2

Weight: 125 lbs. as of 6/13/2023

Sire: USAMARC 1514103

Dam: FETT 111H

NSIP ID: N/A

Scrotal Circumference: 30 cm as of 6/13/2023

I picked this ram up in Iowa while on our belated honeymoon! We needed new Romanov genetics and are happy with him. If you want to do accelerated lambing or increase your lambing percentages, try a Romanov ram on your flock and keep all the daughters. They won't be the prettiest sheep but I'm willing to bet, they will be your most profitable sheep.
