Glenbrook Farm

About Us

Matt started raising commercial Katahdin sheep in 2008 on his parent's farm. In 2009, he sold that flock and bought a registered flock of Katahdins and moved them to the current farm location. In 2013, he joined the National Sheep Improvement Program which provides estimated breeding values to select animals using data. In 2018, he added a small flock of White Dorpers from Paul Lewis in Oregon. He also added a few Romanovs that same year. In 2022, we added Texels from the West Virginia University flock dispersal which brings our current ewe flock to approximately 130 Katahdins, 30 White Dorpers, 20 Romanovs, 20 Texels and 150 commercial ewes.

Our goal as a farm is to use data and visual appraisal to breed sheep that excel in commercial sheep production. For any questions please contact Matt Nolt at **(717) 419-1980**.

Thank you for your interest in our sheep!

NSIP EBV and Indexes Descriptions

BWT: Birth Weight EBV (kg) estimates direct genetic effects on weight at birth. Positive selection is anticipated to increase birth weight and have correlated positive effects on early lamb survival, especially with twins and triplets. Negative selection is anticipated to reduce birth weight and lambing difficulty associated with oversize lambs, especially in singles.

WWT: Weaning Weight EBV (kg) provides an estimate of preweaning growth potential and will likely receive positive selection emphasis in most flocks.

PWWT: Postweaning Weight EBV (kg) combines information on preweaning and postweaning growth to predict genetic merit for postweaning weight at 120 days. Positive selection is expected to favor rapid growth to typical market ages.

NLB: Number of Lambs Born EBV evaluates genetic potential for prolificacy. Expressed as numbers of lambs born per ewe lambing. Ewes with +0.10 are expected to have an average of 0.10 more lambs at each lambing than average ewes and their daughters are expected to have an average of 0.05 more lambs at each lambing compare to daughters of average ewes.

NLW: Number of Lambs Weaned EBV evaluates combined ewe effects on prolificacy and lamb survival to weaning. Expressed as number of lambs weaned per ewe lambing. Ewes with 0.10 are expected to wean an average of 0.10 more lambs at each lambing than average ewes, and their daughters are expected to wean an average of 0.05.

MWWT: Maternal Weaning Weight EBV (kg) estimates the genetic effects of the ewe on the weaning weight of her lambs (a measure of the ewe’s merit for mothering ability). Mainly reflects genetic differences in ewe milk production. Ewes whose lambs grow faster than predicted are assumed to be better milk producers, those that grow slower are assumed to produce less milk.

Scrapie Genotype Resistance Descriptions

RR — Resistant **QR** — Moderately Susceptible **QQ** — Highly Susceptible

Scrotal Circumference: Rams with larger scrotal circumference tend to produce more semen of greater viability and tend to sire daughters that reach puberty earlier and ovulate more eggs.

Our Sires

10 Sires

LWD 20241: Dorper Sire Ram

Registration: RP54227 **Date of Birth:** 3/27/2020

I bought this sire at Paul Lewis' sale spring of 2021. This is an awesome sire who's offspring will add pounds and quality to your lambs. Clean shedding coat. Note his scrotal circumference! We sold this ram but still have some semen from him. His offspring in the sale are from our AI project last fall. We will have a limited offering of his genetics.

JM 264: Dorper Sire Ram

Registration: RP193987 **Date of Birth:** 2/28/2023

There is no other Katahdin currently in NSIP with this combination of high traits! This ram is off the charts! He is sired by Ewe Lamb Right's (ELR)WRI 19065, the General, who was the highest selling ram at the 2019 Virginia Tech ram sale and the dam is ELR's Quad Queen, a Katahdin ewe of unknown origin or age, that had 22 lambs in 8 years recorded in NSIP. Whether you want to improve growth or maternal traits, this sire's offspring will do it.

GLENBROOK 23027: Katahdin Sire Ram

This is a medium framed, easy fleshing ram that is very well put together. His dam produced 11 lambs and raised 9 in the last 4 years. His sire GB 20223, stamped his lambs with heavy bone, fast growth and early maturity. These traits are seen in his offspring. We sold this ram last year. He is a full sibling to GB 22149.

GLENBROOK 23038: Katahdin 75% Sire Ram

Registration: 213749 **Genotype:** QR **Date of Birth:** 1/28/2023
Birth Type: 2
Weight: 183 lbs. as of 6/22/24
Sire: ELR 21400

This is a heavy boned, deep bodied ram which should produce awesome replacement ewes. He has great EBVs across the board. This is one of my favorite rams I have ever produced. We sold this ram in our July 2024 sale.

GLENBROOK 23151: Katahdin 75% Sire Ram

Registration: 213753 **Genotype:** QR **Date of Birth:** 2/11/2023

Birth Type: 2

Weight: 203 lbs. as of 6/22/24

Sire: ELR 21079

This ram has it all! If you're looking to add size, growth and maternal traits, he can do that. Rams like this don't come around often. This sire was sold in our July 2024 sale.

GLENBROOK 22149: Katahdin AI Sire Ram

Registration: 201300 **Date of Birth:** 2/08/2022

We sold this sire in 2022 but ended up buying half shares back. Unfortunately, we lost him a year later but not before we collected semen from him. He is a full sibling to GB 23027. His offspring in the sale are from our AI project last fall. We will have a limited offering of his genetics.

KRK 18596: Katahdin AI Sire Ram

Registration: 174532 **Date of Birth:** 1/26/2021

Birth Type: 3

Weight:

This ram has bred by Karen Kenagy in Oregon. We purchased his semen and used it in our AI project last fall. We will have a limited offering of his genetics. This is him as a lamb.

SRZ 22046: Katahdin AI Sire Ram

Registration: 196425 **Date of Birth:** 4/19/2022

Birth Type: 2

Weight:

Sire: PTK 20080

Dam: SRZ 21067

NSIP ID: 6401822022SRZ046

BWT	WWT	PWWT	NLB	NLW	MWWT
.46	1.8	3.2	14	16	1.69

This ram was bred by Stuart Zimmerman in Missouri and sold at the 2023 Katahdin Expo for \$4200. We purchased his semen and used it in our AI project last fall. We will have a limited offering of his genetics. He has sired very consistent medium framed, smooth coated lambs. He also has good parasite resistance. His offspring is a good choice for low input grass based systems.

FETT 274J: Romanov Sire Ram

Registration: U16744 **Genotype:** QR **Date of Birth:** 3/27/2021

Birth Type: 2

Weight: 125 lbs. as of 6/13/2023

Sire: USAMARC 1514103

Dam: FETT 1111H

NSIP ID: N/A

Scrotal Circumference: 30cm as of 6/13/2023

We picked this ram up in Iowa while on our belated honeymoon! We needed new Romanov genetics and are happy with him. If you want to increase your lambing percentages or do accelerated lambing, try a Romanov ram on your flock and keep all the daughters. They won't be the prettiest sheep but they will be your most profitable.
