INTRIGUING SIREs

Lot # Quantity Name aAa

3A 12 straws 72H565 Hanoverhill Logic 132
Plus on Fat .09 and Pro. .08. Starbuck out of an EX96 Triple Threat. His full sister sold at the Hanoverhill sale for \$635,000.

3B 10 straws 200H3067 Pursuit September Storm RC 156
Very popular Red Carrier sire in his days. Tremendous rear udders.

3C 9 straws 76H252 C Hanoverhill S Regency 231
This is a full brother to Hanoverhill Raider. Starbuck x EX90 Elevation next dam is EX97 Roxy.

3D 14 straws 3H527 Willow-Farm Rockman Ivanhoe 261
Customer Satisfaction bull. The 1982 sire directory says owners of Willow daughters rate him as one of the top sires for trouble free udders, fast milk out and good dispositions. In the 1985 sire directory it says he has a reputation for the "best udders" of any Holstein sire in the U.S. He is outstanding for desirable udder depth, fore udder snugness, rear udder height and width, and teat placement. In the dairyman evaluations they did back in those day this bull ranked very high in udder, feet, legs, milking speed and disposition. When ask "Would you want another cow like her?" 90% replied "Yes".

Our experience has been the same. Willow daughters are calm easygoing medium sized nicely put together cows with good udders and proper teat placement. Willow is generally not considered a high fat bull however we do have a second lactation willow daughter averaging over 5% fat.

3E 5 straws 54H552 Hylite Barbwire-Red 312
Sire of show winners around the globe.

Dam is the EX95 Rainyridge Talent Barbara who won 1st place 5 year-old World Dairy Expo and Royal Winter Fair 2010 also All-American 5 year old 2010

3F 3 straws 72H376 Hanoverhill Inspiration 321
Well known sire of the past. He is sired by SWD Valiant. Dam is an EX96 Triple Threat.

3G 5 straws 29H8557 Ricecrest Brett 324
Bellwood x Southwind x Ned Boy. Dam has over 39,000 milk. 2nd Dam over 35,000. Aug. 2001 Sire directory promotes this bull as a great Component Improver.

3H 1 straw 94H223 Browndale Stardust 342
Well known sire of the past. Sires wide frames with plenty of strength. Sire of many great cow.

3I 8 Amps 72WWI Branderlea Citation Topper Red 462
In his day this was a very popular Red and White Citation R son. Great Butterfat improver. Unique aAa number. At one time his semen sold for over \$100 a unit.

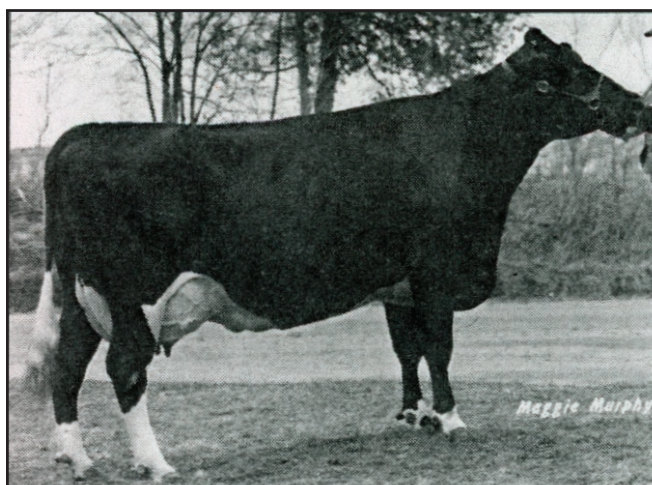

3J 5 straws 40H2071 Westmoreland Brigadier 465
Dam went EX91 2E and was the first cow to top 1,000 pounds fat in each of her first 4 Lactations. At 5-10 in 365 days she made 32,516 milk with 4.2% Fat.

3K 6 Amps 40H73 Crescent Beauty Triumph SRR-6 612
Dam scored 95 pts. Winning multiple shows and producing 20,000+ milk with 4.4% Fat. Use this bull on cows needing 615 or 651 aAa numbers. Component Improving Sire (+.08% Fat +.10% Pro.)

3L 1 straws 73H1965 Startmore Rudolph 612
Legendary Sire.

3M 2 straws 72H546 Startmore Supreme 621
Hanoverhill Starbuck son out of the same cow family as Startmore Rudolph.

3N 10 straws 1H205 Westmoreland Elevation Prince 651
I had a guy tell me, at one time his dad was milking 15 or 16 Elevation Prince daughters. They all lived to be 10 to 12 yrs old and their udders held up extremely well. He is tested A2A2

Willow daughter – 3E94 – EEVE

A2A2 AND POLLED

Lot # Quantity Name aAa

4A 10 straws 120H4385 Farmstead Charleston P Red 156

Charleston P Red is siring a consistent pattern. His first daughters are calving this fall. His sire Hulk P Red brings High Components (5% Fat 3.8% Pro.) from the Helen family at-Ja-Bab. His dam was a Rex PP Red Daughter. Second dam is still in the herd at 160,000+ LTM.

4B 10 straws 120H4768 Farmstead Artic Fox P RC 216

In the first 3 generations behind Artic Fox you will find 6 VG or EX cows and 5 bulls that went EX. His sire Black-Brook Outside Cupid went EX94 and is out of a EX90-3E Maughlin Storm daughter with 283,440 Lifetime milk. Her dam is Black-Brook Juror Crunch EX91-3E with 255,640 lifetime milk. She is also out of a 200,000+ Lifetime cow. On the bottom side his 3rd dam is the EX96 4E Apple cow who finished with a lifetime of 240,640 4.7 11394 36 8559. He is A2A2 - Polled and Red Carrier.

4C 10 straws 724H2004 Vogue A2P2 PP 315

A2P2 is EX97 with over 13,000 daughters. If your looking for a A2A2, homozygas polled high Component proven sire, this is it.

JERSEY SEMEN

PAYDEN - PP

A2A2, Homozygous Polled, aAa 642

Payden-PP 1½ yrs. old (Spots are from ringworm)

Dam is one of our bigger cows with good test. I hadn't paid a lot of attention to her until one of my brothers said he had been watching her record & thought she might be worth saving a bull from. She started out lower in milk, but has come up to 14,163 lb. on her 4th lactation. Has a nice udder that flattens out well. Her average yearly production is: 11,126 Milk 6.0% Fat 4.2% Pro.

Payden's Dam about 8½ yrs. old
233 days in milk 38.5 lbs. milk
6.6 F 4.8 P

OTTAWA - PP

A2A2, Homozygous Polled, aAa 324

Ottawa-PP 21/2 yrs. old

Dam was more high strung, and milked herself off too much, or else simply got arthritis & only lasted for 6 lactations. Her 1st 4 calving dates were all less than a year apart. Her average yearly production on DHI record is; 13,448 lb. Milk 5.5% Fat 4.0% Pro. Even with her arthritis, her SCC on her last lactation was all 200,000 or less, with half of them under 100,000- the lowest was 38,000.

TYMOCHTEE - PP

A2A2, Homozygous Polled, aAa 4263

Tymochtee-PP 13/4 yrs. old

Dam was a more calm cow with a nice udder- not too low even at 14 years old. She was still getting around quite well, with good body condition. My biggest drawback on this cow is her fertility- we've had a lot of trouble with her being cystic, and therefore running long lactations. Her daughters are settling very well though- the one that is a full sister to this bull has settled 1st service on all 5 lactations. Dam's average yearly production is: 12,148 Milk 5.2% Fat 4.1% Pro. On her last lactation her SCC was all under 62,000 on all the tests except for 2 of them, and 4 tests were at 13,000.

DUDLEY - PP

A2A2, Homozygous Polled, aAa 243

Dudley PP 11/2 yrs. old (Spots are from ringworm)

Dam is a friendly, energetic cow with a round belly. She has a nice udder although it doesn't flatten out as well as some, and she runs a little higher in somatic counts. Last lactation average was 326,000. She also started out lower in production, but has come up every year. On her last lactation she milked 12,699 lb. in 285 days. Her average yearly production is : 11,171 lb. Milk 6.0% Fat 4.3% Pro.

Dudley's dam almost 9 yrs. old
6th Lac. 335 days 14,117 Milk
6.1 Fat 4.2 Pro.

A2A2

ENHANCER

SEMEN FROM ENHANCER HIMSELF AND SIRES WITH ENHANCER IN THE PEDIGREE

Lot #	Quantity	Name	aAa
-------	----------	------	-----

6A	10 straws	73H332 Glenafton Enhancer	315
----	-----------	---------------------------	-----

Enhancer sires tremendous fat and good protein. He was the first Canadian bull to be the #1 on the TPI list. In his days he was the most successful Canadian Sire used in Australia where everything was grazing, so keep that in mind. -Greg Palen

6B	10 straws	76H119 C Stonetown Shadow Red +.16% Fat +.05% Pro.	342
----	-----------	---	-----

His dam is a VG Enhancer daughter. On the top side you have Triple Threat. Both Enhancer and Triple Threat played an important role in the development of the red and white Holstein cow. Shadow is also a great Fat and Protein % improver.

6C	6 straws	76H146 Bubbling-Brook Deluxe RC +.15% Fat +.05% Pro.	351
----	----------	---	-----

Deluxe is sire by To-Mar Blackstar out of an EX94 Carlin-M Ivanhoe Bell. Next dam is an EX93 Enhancer. Another good proven Component %age in prover. Red Carrier.

6D	9 straws	73H1414 Brooknook Milestone Red +.25% Fat +.05% Pro.	423
----	----------	---	-----

Red and white Enhancer Son with extremely high Fat. Dam was a VG88 Poverty-Hollow Milestone next dam VG87 Triple-Threat again combining Triple Threat and Enhancer.

6E	16 straws	120H4173 Farmstead Enhancer Dancer	315
----	-----------	------------------------------------	-----

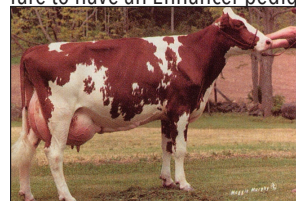

Being challenged with finding Enhancer semen we kept an Enhancer son out of one of our better cows. The dam of Dancer had a best record of 327 d 23,171 milk 3.8% Fat 870 lbs. 30% Pro. 705 lbs. This record was made in an Organic, grazing environment with no corn silage, or bean meal. Of all the Enhancer daughters we've milked over the years every single one of them was among the top producers in their age class. As 2 yr olds their udders seem to be a bit large compared to the rest of the body, however as they calve in again the rest of the cow grows and the udder blends in nicely. Enhancer sires high wide rear udders with proper teat placement and adequate teat length.

6F	4 straws	1H630 Shady-Lawn-U Logic Red	321
----	----------	------------------------------	-----

Dam of Logic is the VG85 Shady-Lawn-U Licorice-Red Enhancer daughter.

6G	10 straws	91H3161 Maple-Merry Prelude Carl	516
----	-----------	----------------------------------	-----

Sired by Ronnybrook Prelude out of an EX91 Enhancer daughter. It is rare to have an Enhancer pedigree with a 516 aAa number. +.13% Fat.

Shady-Lawn U Licorice-Red (VG)
Dam of Logic-Red

Heart Attack provides the unique opportunity to access bloodlines from the Swiss cow Suard Jordan Irene-RED EX 97 6E. A cow whose nearly faultless conformation not only impressed in show rings for many years, where she won numerous accolades, but also enabled her to reach 17 years of age and produce an incredible lifetime production record of 253,199 lb. 4.73%F 3.38%P! Heart Attack's maternal line is also internationally known, he goes straight back to Ski-Hi Mars Helen. His dam is still a young cow with a recently completed first lactation record of 1-10 283d 21,780 lb. 4.2% 920f 3.0% 650p. The second dam with a similar first lactation record of 1-10 3x 298d 22,198 lb. 4.4% 970f 3.3% 737p later produced an amazing best record at 4-08 3x 365d 39,470 5.2% 2,058f 3.2% 1,264p! His pedigree also includes Advent RED and elsewhere traces back to the Roxies. He is Red polled and A1A2.

NOW OPEN AT OUR NEW LOCATION - STOP BY FOR A VISIT

Does your grassfed herd feature the dairyness and strength of this lineup of
Ayrshire cows?

Tap into the heart of this herd with the son of the cow on the far right,
Goldwyn Pistol Pete (A2/A2) AAA 642531.

Now being imported from New Zealand. Roger Hancock, veteran Ayrshire breeder,
spotted Pistol Pete's mother as one of the top five cows he's ever seen. Pistol Pete is used on
cows in Roger's Rosemoore herd.

Use Nature's Blueprint Ayrshire to fix the modern frail, sharp cows brought on by
confinement, high-grain diets. For Holstein or Jersey herds that need dairy strength, one
cross will bring you an animal that you can start a grassfed breeding program from,
whether you go back to the original breed or pursue a Ayrshire herd.

\$30/unit + free shipping on 40 units or more or local pick-up on the farm

Micro Drainage Can Help Maximize Results

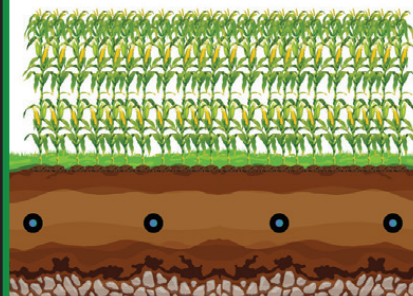

Richland Micro Drainage's goal is to maximize water being absorbed into the soil, rather than depending on surface drainage. With the Micro Drainage System in place, excess water is drained through sub-surface drainage, which is done by removing the water from the root-zone, as opposed to on the surface. The traditional method of sub-surface drainage is to use deep open drains.

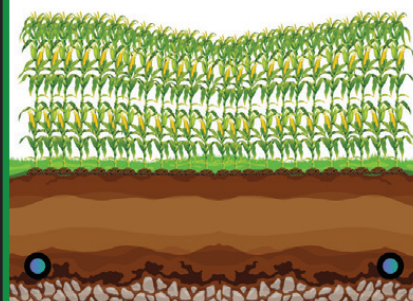

The Micro Drainage System has superior results because of 3 main features: shallow depth below the surface, which results in easier installation and less soil disturbance. Smaller pipe diameters, which minimize the risk of sediment buildup and close lateral spacing, which helps to increase drainage.

According to 25 years of field studies at the Ohio Agricultural Research and Development Center, every \$1 spent on drainage technology, producers get \$3-4 back in corn and soybean profits. Studies show that healthier soil and better drainage lead to increased crop performance.

Leon from Deere Field Farms says "We are pleased with the System Tile Drainage that was installed by Richland Micro Drainage. Their concept on contour design and 20-foot spacing with ideal depth has brought us maximum drainage." He goes on to say, "Having crops with heavy roots, plus lots of residue, we never see any puddles of water or standing water. Our yields are steadily increasing from year to year."

MICRO DRAINAGE. Shallow, closely spaced 2-inch drains remove excess water quickly while maintaining a higher water table for improved crop performance during dry periods.

TRADITIONAL DRAINAGE. Deeper, widely spaced 4-inch drains require more soil disturbance and can leave fields wetter between lines while lowering the water table in dry conditions.
