**INSPECTION OF CATTLE** At Hosking Sales, cattle will be available for inspection on Thursday, Nov. 18 through start of sale. On-farm cattle viewing is available by appointment up before Wednesday, Nov 17.

**To make an on-farm viewing appointment, request photos and inquire, please contact:**

**Adam Dresser, HERDSMAN**  
**716-474-1193**  
**bomber312@hotmail.com**

**REAL-TIME BIDDING** COWBUYER.com is providing real-time bidding of this sale via the internet. Live audio and live video will allow registered buyers to bid on the animals as if they were present. Buyers must **REGISTER PRIOR to SALE DAY** by visiting COWBUYER.com or contact:

**Aaron Ray Tompkins 336-363-4639 / atompkin@vt.edu**

**HERD HEALTH** Cattle are ready to ship immediately. Interstate health charts will be provided on sale day. All costs for exporting cattle are the buyer's responsibility and expense.

**All cattle are negative BVD tested.**

**All cattle will have certificate of veterinarian inspection.**

**All cattle are up-to-date with vaccinations.**

#### THE TERMS OF THE SALE

All animals sell under the standard terms and conditions adopted by the American Wagyu Association.

All attendees wishing to participate in the sale must be registered with the sales management and must obtain a buyer's number.

Cash or good check. Nothing removed until settled for. Credit cards (Mastercard and Visa) will be accepted with a 4% fee. Absentee buyer and Internet buyer payments can be wired to the Sale Manager's Custodial account or paid by Mastercard or Visa within 48 hours after the sale and before cattle can be released.

All cattle have been pregnancy examined. Females bred when sold and pronounced in calf are presumed pregnant but pregnancy is not guaranteed. The seller makes no warranty that pregnant cows will deliver calves or that they will carry full term.

All sales are FINAL.

Please examine your purchases before the close of the sale.

All animals are sold to be right in every way unless otherwise announced. Report any discrepancies to the sale management immediately. At close of the sale, all sales will be considered final and there can be no recourse.

#### HEALTH

Cattle examined for pregnancy and inoculated for shipping fever.

Announcements from the auctioneer box take precedence over the catalog and any prior released information.

**GENETIC DEFECT TESTS** Cattle selling genetic free by test or pedigree of known breed's genetic defects.

**TRUCKING** Buyers are responsible for their own trucking arrangements for all lots (live, embryo and semen).

**Bob Witheral / 845-895-3463**

**Bostelman Livestock Transportation / 607-639-1234**

**Lathrop Trucking / 847-426-5009**

**Spuds Trucking / Alan Paulson / 605-868-9028**

All cattle become the buyer's risk as soon as sold. Cattle will be cared for at the yards at seller's expense for 48 hours. After that, all costs are the buyer's responsibility. The weekly sale is on Monday. So please ship your cattle immediately due to space requirements.

**LIABILITY** All persons attending the sale and related functions do so at their own risk. Oakfield Corners, Hosking Sales, LLC and its employees and representatives assume no liability, legal or otherwise, for any accidents or injuries that may occur.

**IDENTIFICATION OF CATTLE** Lot numbers on the cattle will correspond to the sale catalog.

**LUNCH** Will be available on sale day.

**Dam Lots 1 to 17 - TBR TOMIKO 2 7 6679F AA Tend 10**

From Triangle B program. Prolific brood cow - 16 progeny sell and 1 embryo lot. Doi blood from Hyogo, Japan - Kobe Beef origin. AA-10 donor averaging 5 embryos over 5 IVF collections! Produced 25 IVF embryos.

*Coming from storied Triangle B program in Oklahoma you know this donor is backed by nothing but performance on top of performance! Since she is linebred former #1 marbling bull for many years JVP Fukutsuru 068 top and bottom with some Monjiro top and bottom by way of Michifuku and Sanjiro this heifer is LOADED with top of the line Doi blood from Hyogo, Japan where Kobe Beef comes from!*

**Open Heifer / Two Generations AA / 10**  
**Dam from Triangle B Program Oklahoma**  
**Direct from Doi line Tajimas in Hyogo, Japan**

*Here's a chance to get a beautiful direct daughter of the great original import bull Michifuku! Mich came straight from Hyogo, a 100% Doi line masterpiece directly sired by Monjiro, a legendary marbling bull in Japan who's semen sold for \$50,000 per straw on the black market in mid 90's when USA exports from Japan were being worked out. Her dam came straight from the great Triangle B program in Oklahoma and features a focus on high Tajima marbling genetics making this heifer one of the highest Doi line animals in the sale. The Doi line in Hyogo, Japan is famous for being the line of Wagyu that produces fabled Kobe Beef. To this day Doi line Tajimas are considered to produce the most superior tasting fat of all lines of Wagyu.*

LOT 3 [Bull] Two Generations AA / 10

Here is another standout AA-10 bull and AA-7 heifer with a double linebred "queen of the breed" herself Suzutani sire on top and a powerhouse high Tajima dam featuring the former #1 marbling sire for many years Fukutsuru 068 as well as two Monjiro bred bulls Sanjiro and Michifuku. Monjiro was so potent and powerful that straws of his semen were selling for \$50,000 a straw in the mid-90s at the time of US imports. This bull and heifer have Monjiro in ALL 4 LEGS OF HIS PEDIGREE! Some powerful stuff here!

### Balanced Genetic Package

This AA-7 bull is from the great Itoshigefuji 147 sire line. 147 was the largest bull ever exported from Japan with a reported live weight of over 2600 pounds! He has been very lightly utilized in herds around the world because he is a recessive disorder carrier but this bull's sire is free of all recessives so you get all the good of a 147 line sire without the bad! This bulls' top side also sports the great Kimifuku 3 bull which is reportedly Mr Takeda's best marbling bull who is heavily utilized in his feeder program here in USA. This bull's bottom side is stacked with classic high marbling Tajima lines featuring 068, Sanjiro and Mich! Great opportunity to get an outstanding balanced genetic package!

SIRE 9059W adds rare growth and milk genetics of 147 while maintaining marbling from a strong carcass performance bottom side of pedigree - a unique blend of growth and marbling. His sire TF Itoshigefuji 147 is THE LARGEST bull ever exported from Japan - reportedly 2700+ lbs that throws extreme frame and growth. Since 147 is a carrier, utilizing a carrier-free son like 9059W is a great way to add these rare 147 genetics without bringing recessive disorders into your herd. His dam is a marbling machine sired by a great Takeda bull Kimifuku 3 and a Hikokura line cow.

### LOTS 13 + 14

#### Open Heifers [Maternal Sisters Lots 1,2,13,14,16]

Here we have a direct daughter of the great foundation bull Shigeshe-tani and a sterling bred donor from the Triangle B program in Oklahoma. Shigeshe-tani is a standout son of the great Nami line donor cow Suzutani who is also the dam of Sanjiro and Sanjiro 3 among many other legends. The Nami line is a substrain if Tajima famous for extreme fineness and high marbling quality. Shigeshe-tani's sire Haruki II was one of two direct sons of Monjiro that were imported. Monjiro was one of the all time great sires in Japan with semen selling on the black market for \$50,000 at one time. This heifer also has the former #1 marbling bull Fukutsuru 068 on her bottom side. Plenty to be excited about here!

#### LOT 15 [Bull]

This bull is sired by the great Shigeshe-tani, one of Suzutani's most influen-tial sons who has made quite a name for himself around the world with the consistency of his outstanding marbling ability. Shigeshe-tani is one of the most time tested bulls in the world and everywhere he is tried he outper-forms. In Australia he was used to produce a group of several thousand F1'a and over 90% graded prime and above! This bull's grand dam Suzutani is the queen of the breed after producing so many influential bulls and cows that continue to shape the direction of the breed. Aside from Sanjiro and Sanjiro 3 when bred to Michifuku, and Shigeshe-tani when bred to Haruki II, she also produced the great Australian bull Shikikan when bred to Takazakara who was #1 marbling bull in Australia for many years. The bottom side of this bull's pedigree features the Monjiro in both legs with a dam direct sired by the for-mer #1 marbling bull Fukutsuru 068. This bull should add all the marbling you could ask for and produce the kind of high value F1's the feedlots love!

**Open Heifer**

This heifer's sire is one of the most special bulls in the world! Her maternal grandsire TF Kikutsuru Doi 146 had a sire and dam who were both sired by the same bull as the all time GOAT in Japan Yasufuku J930! Yasutani Doi was a main go to bull in Hyogo Japan where Kobe Beef comes from for many years and his greatest life's work was Yasufuku J930 who to this day is considered the greatest bull Japan has ever produced and he sits at #1 in Kenichi Ono's book Most Influential Wagyu. The issue with 146 is that his semen as severe motility issues and VERY FEW fullblood offspring have ever been produced by him. The only way to get any is to spend lots of money on IVF procedures and even then many times you will get zero conversion from oocytes to embryos. Well, they used 146 semen to get a carrier free bull from an ItoshigeNami over ItoshigeNami dam to get this heifer's sire! 148 is the only Nami line bull we have which is the dominant line of Tajima in Japan today. Add a heavy Doi line bottomside and you have a truly special female acquisition opportunity here!

Sire Lot 17 - HLW KIKUYASU AA10

**SIRE AA10** Well balanced pedigree for breeding stock or meat production. Dam comes from Crescent Harbor Ranch program. Maternal Brother to sire MFC Itomoritaka 0-41.

**Lot 18 Female OCD MICH HOORAY 4881J ET #64881 Born 05/10/2021 FB71398 Black AA Tend 8**

Open Heifer

*Here is one more beautiful Michifuku daughter from the famous Hikokura line cow family that is loaded top and bottom with classic Doi blood straight out of Hyogo where Kobe Beef comes from! The Hikokuras were imported by my Takeda himself and are heavily utilized in his beef operation here in the USA to this day! They are known for their outstanding balance of growth, milk and marbling and have withstood the test of time. Great opportunity to get an extremely high Tajima female with the added value of Hikokura cow family mitochondrial DNA coursing through their veins.*

**Lot 19 Bull OCD MICH HAKIM 4907J ET #64907 Born 05/14/2021 FB71411 Black AA Tend 7**

LOT 19

*Here is a great quadruple linebred Monjiro bull by way of Michifuku one of two Monjiro sons that came over from Japan and Haruki II the only other Monjiro son to make the trip. Monjiro was an elite carcass bull in Japan. This bull's pedigree also sports Kikuyasu 400 the largest 100% Tajima ever exported from Japan weighing in over 1900 lbs as well as the GOAT carcass bull Itozuru Doi 151 who is still the primary bull used by A to Z feeders in Iowa to make feeder steers for Mr Takeda himself.*

## Lot 20 **Bull** OCD 1074X HECTOR 5340J ET

Born 05/02/2021 FB71404 Black AA Tend 10 #65340

### Two Generations AA / 10

Pedigree packed with breed legends

*This beautiful AA-10 bull's two grandsires are none other than the former #1 marbling bull for many years Fukutsuru 068 and heavily utilized AI sire Kikuyasu AA-10 who was also an AA-10 himself (name implies). With this bull you get cutting edge of science supporting you and your herd for years to come. These SCD AA bulls have the lowest melting point fat you can get and the 10 score on tenderness correlates to the most tender meat you can get. Bringing home a beautiful, healthy AA-10 bull backed by the highest quality Tajima bloodlines such as this one is like cheating all the way to the front of the line. Outstanding opportunity here!*

### LOTS 22 + 23

These two heifers are out of a AA-10 dam and exceptional and rare sire, TF Mitsuhiokura 149 son 2149Y. Mr Takeda described 149 as a "Precious Jewell" who is very rare in Wagyu pedigrees because he is a recessive carrier, however, his son and the sire of these two heifers 2149Y is carrier free so you get 149 genetics in a carrier free package out of an AA-10 cow with these two heifers! The bottom side of these 2149Y features a Hikokura line cow sired by the largest bull that ever came from Japan TF Itoshigefuji 147 who reportedly weighed over 2600 lbs! The maternal grand sire of 2149Y is Mr Takeda's personal Kimifuku 3 bull utilized heavily in the Takeda feeder program here in the USA as he is known as the best marbling of all the Takeda bulls. What an awesome balance between marbling and growth here!

**Lot 24 Bull** OCD MITSUIT HIROKI 6358J ET #66358 Born 08/25/2021 Black Pending Reg VA Tend 10

This bull is sired by a very rare bloodline bull Mitsuhiokura 149 who is a recessive carrier but this bull's sire is free of the genetic disorder so you get the benefit without the bad. 149 is described by Mr Takeda as a "Jewell" that is not used as heavily as he should due to being a recessive carrier. This bull gives you a chance to bring those rare 149 genetics to your herd.

## Lot 26 **Female** OCD 1074X HOLIDAY 891H ET #54891

Born 08/25/2020 FB60235 Black VA Tend 7

Triple linebred Suzutani

Here is a triple linebred Suzutani female from the Hikokura cow family! The Hikokuras are an elite cow family imported by the great Shogo Takeda himself! Mr Takeda's life's work was bringing Wagyu to the west and to this day he has Wagyu steers fed out in Iowa and shipped back to supply his chain of steakhouses in Japan. The reason cow families get so much attention from experienced breeders is because the mitochondrial DNA is unique to every cow family, remains virtually unchanged for thousands of generations and only passed from the dam. Each cell has millions of mitochondria which are the literal powerhouses of the cell and perhaps nothing will determine overall metabolism characteristics like mitochondrial DNA so now you see why the very best cow families like the Hikokura maternal line are so highly prized!

### Elite carcass quality pedigree

These bulls are direct sons of the great original import bull Michifuku and out of a linebred Michifuku cow! Michifuku is one of the great utility bulls of the breed famous for throwing huge ribeyes and that supreme tasting Doi fat! Michifuku was chosen from 1000s of bulls in Japan due to his being a direct son of a great marbling bull in Japan named Monjiro whose semen was selling for \$50,000 in Japan in the mid 90's at the time of the US imports. This bull is a grandson of the great Monjiro! In fact close to 40% of his DNA comes from Monjiro so you get elite carcass quality heavily concentrated in these bulls in a nicely linebred package which will yield higher uniformity and consistency in quality.

**#65758** Born 08/28/2021 Black Pending Reg AA Tend 4

Heifers LOTS 32 - 35  
/Balanced Genetic Package  
Large Amount of Tajima blood

The dam to these 4 open heifers is Lot 27 a wonderful balance of high marbling Tajima lines with some of the best performance Wagyu bulls like Shigeshigetani, Itozuru Doi 151 and Kitaguni Jr who is the only direct son of 2x "Wagyu Olympics" champion Kitaguni 7/8 ever imported. When coupled with 9059W, this pedigree should yield loads of growth and milk while maintaining the quality marbling that you would expect from so much Tajima blood.

◀ LOT 27 OCD KIKU HANA 803G ET AA Tend 7

**SIRE 9059W** adds rare growth and milk genetics of 147 while maintaining marbling from a strong carcass performance bottom side of pedigree - a unique blend of growth and marbling. His sire TF Itoshigefuji 147 is THE LARGEST bull ever exported from Japan - reportedly 2700+ lbs that throws extreme frame and growth. Since 147 is a carrier, utilizing a carrier-free son like 9059W is a great way to add these rare 147 genetics without bringing recessive disorders into your herd. His dam is a marbling machine sired by a great Takeda bull Kimifuku 3 and a Hikokura line cow.

### Balanced Genetic Package / Large Amount of Tajima blood

These four bulls are sired by 9059W who comes from the great Itoshigefuji 147 sire line. 147 was the largest bull ever exported from Japan with a reported live weight of over 2600 pounds! He has been very lightly utilized in herds around the world because he is a recessive disorder carrier but these bulls' sire is free of all recessives so you get all the good of a 147 line sire without the bad! These bull's top sides also sport the great Kimifuku 3 bull which is reportedly Mr Takeda's best marbling bull who is heavily utilized in his feeder program here in the USA. These bull's bottom sides are stacked with classic high marbling Tajima lines the largest 100% Tajima ever exported from Japan, Kikuyasu 400, as well as four of the greatest marbling sires to ever leave Japan, namely Sanjiro, Shigesigetani, Itozuru Doi 151 and Itoshigenami! Great opportunity to get an outstanding balanced genetic package here with these 4 bulls!

Triple linebred Suzutani / Nami blood

Proven Donor IVF 5 embryo avg on 3 collections 5 embryo avg for 3 collections

Maternal Sister to Lots 26,27,42,49

*This donor is sired by 3-39 a very special standout bull at the historic Muddy Flats sale several years ago. He has extreme length and injects heavy linebred Monjiro and Suzutani blood into this donor cow and her progeny. Add Suzutani two more times on bottom and you have a triple linebred Suzutani masterpiece sporting an above average amount of highly prized Nami blood by way of the GOAT cow and queen of the breed Suzutani herself. The 56T bull you see on her bottom side is a phenotypic standout that adds depth and girth to his calves without sacrificing marbling. This 2 year old has been a solid donor producing 5 embryos per IVF with her best production years ahead of her so there is no risk here.*

Queen of the Breed Suzutani throughout pedigree  
 Photo upon request

*This bull is sired by the uber special 4051A bull who is precious and valuable due to being a direct son of 146, a bull whose semen motility significantly reduced proliferation of his genetics. 146 was also a carrier but 4051A is carrier free which is another plus. The dam is a quadruple linebred Suzutani cow which is impressive since she is considered the GOAT of all female Wagyu outside Japan and having her blood in all 4 legs of a pedigree is something special.*

WESTHOLME MORIFUJI (AI)

LOT 49 OCD KIKU HIKARI 822G ET

**SPECIAL NOTE**

*These embryos by Q38 are possibly the first offered at a public sale in the US!*

The EBV's for Q038 indicate a truly elite bull. Q038 ranks in the Top 5 of all bulls registered on BREEDPLAN for SRI. He is by the super sire SMOFF0154, and his dam is by prolific sire HIRAMICHI TSURU, still considered one of the best sires in the Westholme stud line. Q038, with his strong balance of figures, would be a powerful addition to the genetics of any herd. He is Top 1% for all Breed object \$ indexes and free of all genetic disorders. N.B can be used to produce embryos for export.

 Kedaka and Shimane blood  
 Proven Prolific Donor: IVF 6 embryo avg for 5 collections  
 Flushmate to Dam of Lots 51 + 52

*Here's a rare opportunity to acquire the status of an AA-10 donor with above average high growth Kedaka and Shimane blood coursing through her veins. With 002, 147 and Z278 all appearing in her pedigree don't let the SCD and tenderness score fool you this heifer has growth and milk to go with it!!! The growth blood notwithstanding look at all the legendary marbling bulls in her pedigree: 068, 148, Michifuku and Kitaguni Jr who was the only son of two time Wagyu Olympics champ Kitaguni 7/8! What a balanced, high performance donor who has averaged 6 embryos produced over 5 IVF collections! Real long term value opportunity here!*

Son of breed legend Michifuku

Check out this direct son of breed legend Michifuku! Mich has been a go to bull for many programs for years. If you've ever been getting it wrong and need to get it right just go back to ole Mich! He throws way above average white picnic plate sized ribeyes and always puts that fine marbling and superior tasting Doi line fat into his steaks! The Doi line fat to this day is still considered the best tasting and highest quality fat in all of Wagyu in Japan! The dam of this bull is double linebred Michifuku as well, so you basically have a heavy concentration of a classic right here! Everyone loves that Mich blood! Make the kind of steaks that change people's lives with this guy! Can't go wrong here!

**Lots 57 to 62**

**High Doi blood concentration - where Kobe Beef comes from**

**High marbling Tajima blood too**

*Lots 57 - 62 are all out of Lot 56 cow, a triple linebred Monjiro masterpiece sired by an AA-10 bull! The sire of these heifers 1074X is a VERY special direct son of perennial marbling powerhouse JVP Fukutsuru 068 who held the #1 spot for marbling for many, many years and continues to dominate marbling statistics worldwide. 1074X's dam is a direct daughter of Sanjiro who is a flushmate to the current #1 and king of marbling Sanjiro 3. So these heifers are sired by a son of the former #1 marbling bull bred to a daughter of the current #1 marbling bull's flushmate! Also lurking down on 1074X's pedigree is the original import Chisahime 662 cow who is a grand daughter to the original Yasutani Doi, the father of the all time GOAT in Japan: Yasufuku J930. Absolutely cannot go wrong here!*

## #64871 Born 05/06/2021 FB71406 Black AA Tend 10

### Triple linebred Monjiro

Another of the four AA-10 bulls of sale. He is from Tajima high marbling powerhouse that features a triple linebred Monjiro pedigree with added power of Fukutsuri 068, Shigesigetani, Itozuru Doi and Itoshigenami coursing through his veins. 068 was the #1 marbling bull for many years and Shigesigetani yielded F1 groups that consistently averaged over 90% prime in Australia. Itozuru Doi is considered the all time GOAT as is evidenced by the fact that of all the bulls Mr Takeda imported from Japan, Itozuru Doi was the only one he ever cloned and cloned at least FIVE TIMES!!! What does Mr Takeda know that you don't?

## Lot 65 **Bull** OCD KIKU HARVEY 5354J ET

Now pay attention here! This bull is sired by one of the great marbling pedigrees in all Wagyu! The 4051A bull is a rare direct son of Kikutsuru Doi 146, the only linebred Yasutani Doi bull to leave Japan however, his semen has severe motility issues making ET and AI all but 0% effective. Even with IVF results are very low....I know of programs who have spent multiple six figures at Trans Ova trying to get calves from the original 146 and ended up with NOTHING! Yasutani Doi is the sire of the all time greatest bull Japan has ever produced. A bull that still sits atop the all time most influential Wagyu list by the name of Yasufuku J930. And did we fail to mention that the dam of 4051A is linebred Itoshigenami 148 the only Nami line Tajima sire ever exported? The Nami line is highly influential in Suzutani and a big component of her genetic firepower. To have a bull out of an AI sire who is a cross of 146 on a linebred Itoshigenami bred to a linebred Suzutani cow is truly exciting! One of the heaviest Nami line pedigrees with added power of the uber rare 146 blood up close!
