44th Annual Southwest Virginia Performance Tested Bull Sale

Saturday, March 25, 2023 ★ Noon

**New
Location**

APEX Center | Wytheville, VA

**Open House
At
Mountain Spring Farm
Wytheville, VA**

**Sunday, March 19
1:00 - 4:00 p.m.**

**View video of bulls at
www.bcia.apsc.vt.edu**

**Angus ★ Charolais
Gelbvieh ★ Gelbvieh Balancer
Hereford ★ Simmental ★ Simmental Hybrid
Red Angus**

VIEW/BID LIVE ON THE INTERNET!

**FREE DELIVERY OF SALE BULLS
up to 250 miles**

Dear Friends:

Please make plans to join us for our 44th Annual Southwest Virginia BCIA Performance Tested Bull Sale to be held on Saturday, March 25 at 12:00 noon. Please take note- **we have a new sale location this year** and look forward to having our sale at the APEX Center in Wytheville. The APEX Center is conveniently located at the same exit and directly across the interstate from our previous sale site (see following page for address and directions). Our annual Open House at the test facility outside Wytheville will be held on Sunday March 19, from 1:00-4:00 p.m. This will be an excellent time to view the bulls and visit with the breeders and everyone involved- we hope you can join us! Thank you to Brian and Kayla Umberger at Mountain Spring Farm for all they do on behalf of BCIA.

Over the years, the Southwest BCIA Bull Sale has earned a strong reputation across the region as one of the premier sources for quality genetics from multiple breeds. The consignors have worked hard to assemble this set of bulls with the goal of upholding that tradition. Study the pedigrees and EPDs on these bulls and you will find genetics to meet your needs. All bulls have genomically-enhanced EPDs, which is a commitment by BCIA to offer you the most accurate tools we can to help you make selection decisions. All bulls have met BCIA's stringent requirements to make the sale, and all bulls sell with our enhanced guarantee which provides assurance for soundness and fertility, and our promise to stand behind our product. Volume buyer discounts are available with the purchase of two or more bulls. Again this year, we will provide complimentary delivery for bulls following the sale.

We regret that we will not have heifers to offer at this year's sale. The BCIA-Influenced Heifer Sale has developed a strong reputation as a source of quality females, and we have full intentions of offering a great set of bred heifers again in 2024.

The sale will be available online through CowBuyer.com. If you cannot join us in person, we hope this service provides you the convenience and ability to participate in the sale. See details contained in this catalog for more information. Commenting this, video is available on all the bulls which can be accessed on the BCIA website. As always, we will have bidding available over the tel-auction or feel free to give one of us a call if you need assistance prior to or during the sale. We would be happy to assist you any way we can to purchase bulls that meet your needs. The bulls will be delivered to the APEX Center in Wytheville on Friday afternoon prior to the sale. Contact any of the consignors, Brian Umberger at 276-620-1194, or myself at 540-231-9159 if we can be of assistance in any way. We hope to see you on Saturday, March 25!

Sincerely,

Scott P. Greiner
BCIA Educational Advisor

44th Annual Southwest Virginia Performance Tested Bull Sale

Saturday, March 25, 2023 • Noon

APEX Center, 200 Apex Drive, Wytheville, VA

*Directions: Use exit number 77 off Interstate 81 just north of Wytheville.
Travel east off of exit on Ready Mix Road (straight ahead past
Speedway and Circle K). Facility will be ahead on left.*

OPEN HOUSE SUNDAY, MARCH 19, 1:00PM-4:00 P.M.

SOUTHWEST BULL TEST STATION, Mountain Spring Farm, 255 Grippy Run Road, Wytheville, VA

*Directions: I-81 to Exit 70. Follow US 52 North 4.6 miles to State Route 680 (Black Lick Road).
Take a left on Black Lick Road. Go 1.9 miles to Grippy Run Road. Test Station will be on your right.*

FREE DELIVERY OF SALE BULLS up to 250 miles

ABOUT THE BULLS AND THEIR PERFORMANCE

Scott P. Greiner, Extension Animal Scientist - Virginia Tech

Virginia BCIA contracts with Mountain Spring Farm, Wytheville, VA to develop bulls for its members with the following basic objectives: (a) To provide a standard, impartial postweaning gain test and development program that will furnish records which will be useful to the buyer and consignor in their breeding programs; (b) To provide a source of and market for performance tested bulls; (c) To provide quality genetics which address the demands of the industry, and (d) To serve as an educational tool for beef cattle improvement and promotion.

How the Bulls Have Been Handled

One hundred two Senior bulls (calved September 1 through December 31, 2021) and 115 Junior bulls (calved January 1 through March 31, 2022) were delivered to the SWBTS on October 4, 2022 and went on test October 25 following a 21 day warm-up period. Both Senior and Junior bulls completed the 112-day test February 14, 2023. Upon delivery to the station bulls were vaccinated for clostridial diseases, IBR, PI3, BVD, BRSV, Pasturella, Haemophilus Somnus, and dewormed. They were fed a silage ration supplemented with dry corn, alfalfa haylage, and a commercial protein supplement. The ration was formulated to contain approximately 75% TDN and 13% crude protein on a dry-matter basis.

Sale Requirements

Qualifications for bulls selling within each breed test group was based on the following criteria: **Growth EPDs:** All bulls selling meet minimum genetic requirements (YW EPD) for Virginia Quality Assured (VQA) Purple Tag Feeder Calf Program.

Frame Score: Minimum frame score of 5.0 for all breeds.

Reproductive Soundness: All bulls have been subjected to a breeding soundness evaluation including scrotal circumference measure, internal palpation, and penal inspection. Senior bull evaluation included semen evaluation, and has satisfactory rating as defined by the Society for Theriogenology.

Conformation: A committee evaluated all bulls for structural soundness and phenotype. Unsound or unsuitable bulls have been eliminated.

Sale Eligibility and Order: Additional bulls were eliminated and sale order established using an index combining individual performance (adjusted YW and test ADG) and EPDs (CED, WW, YW, Milk, MB, REA).

Health and Fertility

Negative Anaplasmosis test at delivery. Negative BVD PI test at delivery. Out-of-state health papers available sale day. All bulls evaluated for breeding soundness and fertility- guaranteed to be breeders. Senior bulls have passed full breeding soundness exam (including semen evaluation). Consulting veterinarian is Dr. John Currin from VA-MD College of Veterinary Medicine. See inside back cover for full guarantee.

PERFORMANCE RECORDS

Expected Progeny Differences (EPD)

An EPD is an estimate of the genetic value of an animal as a parent. Specifically, EPDs predict the difference in performance of the future offspring of a parent, compared to the future offspring from another parent in the same breed. EPD values may only be directly compared between animals within the same breed.

EPD	Production EPDs					Maternal EPDs		Carcass EPDs		
	CED	BW	WW	YW	DOC	CEM	Milk	MB	RE	Fat
	+6	+1.0	+45	+92	+11	+7	+24	+45	+35	-0.05

Calving Ease Direct (CED) - Predicts the ease with which a bull's calves will be born to first calf heifers. Higher EPD indicates a higher percentage of unassisted births.

Birth Weight (BW) - Predicts differences in progeny birth weight, measured in pounds. Higher EPDs indicate heavier birth weights.

Weaning Weight (WW) - Predictor of bull's ability to transmit weaning growth to his progeny. Expressed in pounds.

Yearling Weight (YW) - Predictor of bull's ability to transmit pre and post-weaning growth to his progeny. Expressed in pounds.

Docility (DOC) - Predicts difference in yearling cattle temperament, with a higher value indicating more favorable docility (expressed as percentage having most desirable temperament score).

Calving Ease Maternal (CEM) - Predicts the average ease with which a sire's daughters will calve as first-calf heifers, with a higher value indicating greater calving ease in first-calf daughters.

Maternal Milk (Milk) - Predictor of bull's genetic ability to transmit milk and maternal ability to his daughters. EPD expressed as additional pounds of calf weaned by the bull's daughters.

Marbling (MB) - EPD predicts differences in USDA marbling score. Expressed in marbling score units.

Ribeye Area (RE) - Predictor of bull's genetic ability to transmit carcass ribeye area. EPD expressed in square inches.

Fat Thickness (Fat) - Predicts differences in progeny external fat thickness, measured between the 12 and 13th ribs. EPD expressed in inches.

EPD Accuracy (ACC) - Accuracy is an indicator of the reliability of an EPD. Accuracy values range from 0.0 to 1.0. Values approaching 1.0 are reflective of more information used in the calculation of the EPD, and less risk the EPD will change with additional information. 1 = interim EPD, PE or P = pedigree estimate, BK = backsolution EPD.

Multi-Trait Index EPDs

Angus Maternal Weaned Calf Value (\$M) - Index value expressed in dollars per head, is the expected average difference in future progeny profitability from conception to weaning. Includes both revenue and cost adjustments associated with differences in calving ease direct, calving

	\$Values
\$M	+60
\$W	+55
\$B	+125
\$C	+220

ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Angus Weaned Calf Value (\$W) - Index value expressed in dollars per head, is the expected average difference in future progeny profitability differences due to genetics from birth to weaning. Includes both revenue and cost adjustments associated with differences in birth weight,

weaning weight, milk, and mature cow weight.

Angus Beef Value (\$B) - Represents the expected average dollar-per-head difference in the progeny postweaning performance and carcass value compared to progeny of other sires. Combines estimates of genetic merit for growth and carcass merit, which are adjusted for differences in costs of production and expected premiums/discounts associated with grid marketing of progeny.

Angus Combined Value (\$C) - Index value expressed in dollars per head includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B).

Charolais Terminal Sire Index (TSI) - Predicts expected difference in economic merit between bulls when all progeny are placed in the feedlot and sold on a carcass grade and yield basis. EPD expressed in progeny dollars per head.

Gelbvieh \$Cow (\$Cow) - A higher number represents more profitable genetics for maternal productivity. Bulls with higher \$Cow values would be expected to produce daughters with stayability and reproductive efficiency as well as other traits that lead to profitability in a production system, such as milk, calving ease, moderate mature weight and the ability of calves to gain, performance in the feedlot and at slaughter.

Gelbvieh Feeder Profit Index (FPI) - Terminal index designed to aid producers in selecting sires whose progeny will perform in the feedlot and carcasses are sold on grade and yield system.

Hereford Baldy Maternal Index (BMI) - Index designed for commercial cow-calf producers who use Hereford bulls in rotational crossbreeding programs on Angus-based cows and heifers. Retained ownership of calves through the feedlot phase of production is assumed, with fed cattle marketed on a Certified Hereford Beef pricing grid.

Hereford Certified Hereford Beef Index (CHB) - A terminal sire index, where Hereford bulls are mated to British-cross cows and all offspring are sold as fed cattle on a CHB grid.

Simmental All Purpose Index (API) - Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Simmental Terminal Index (TI) - Predicts expected difference in economic merit between bulls when all progeny are placed in the feedlot and sold on a carcass grade and yield basis. EPD expressed in progeny dollars per head.

Red Angus ProS Index (ProS) - Predicts average economic differences in all segments in the beef supply chain when replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included are calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. Index is expressed in dollars per head born.

Red Angus HerdBuilder Index (HB) - Maternal selection index predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born.

Red Angus GridMaster Index (GM) - Predicts the average economic difference of non-replacement calves through the postweaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born.

Percentile (%Rank) Rankings on EPDs - Found in front of catalog. Indicates where EPD ranks relative to all other bulls evaluated within breed. 5 = EPD ranks in top 5% of breed for that trait. 70 = EPD ranks in top 70% of the breed for that trait.

Individual Performance

Perf. Ratio	BW	WW	Test YW	ADG	End Wt.	Frame	Scrotal	U%IMF	URE	UFAT
	82	740	1215	3.75	1375	6.0	35.5	3.75	13.8	0.25
	102	108	105	110				120	107	95

Birth Weight (BW) - Bull's actual birth weight, and within herd ratio. ET = embryo transfer. Absence of a ratio may indicate the bull did not have contemporaries for ratio calculation.
Weaning Weight (WW) - Bull's 205-day weaning weight adjusted for age of dam, and within herd ratio. ET = embryo transfer. Absence of a ratio may indicate the bull did not have contemporaries for ratio calculation.
Yearling Weight (Test YW) - Beef Improvement Federation adjusted 365-day weight calculated from off-test weight, and adjusted for age of dam. Ratio relative to all bulls in test group (same breed and age).
ADG - Cumulative average daily gain for entire test period. Ratio relative to all bulls in test group (same breed and age).
End Wt. - Actual weight when bull completed test.
Frame - Frame score of bull at completion of test period.
Scrotal - Actual scrotal circumference in cm at completion of test.

Ultrasound Data

Ultrasound images were collected as part of the test procedures by Dr. Andy Meadows. Images were sent to an accredited laboratory for measurement determination and adjusted measures provided by breed associations.
Percent Intramuscular Fat (U%IMF) - Objective estimate of the percentage of intramuscular fat within the ribeye muscle (marbling) adjusted to 365 days of age. Ratio relative to all bulls in test group (same breed and age).
Ribeye area (URE) - Ribeye area measured in square inches adjusted to a constant age of 365 days. Ratio relative to all bulls in test group (same breed and age).
Fat thickness (UFAT) - Measurement presented is 12-13th rib fat thickness in inches. Measurements have been adjusted to 365 days of age (ratio relative to all bulls in same test group).
 The following table presents breed averages for ultrasound traits for all bulls in each test group:

Ultrasound Data Breed Means
SWBTS Senior Bulls: Scanned 12/5/22

	Adj. UFat	Adj. URE	Adj. U%IMF
36 Angus	0.12	11.3	3.58
1 Charolais	0.11	11.5	3.19
5 PB Gelbvieh	0.12	11.8	1.77
6 Gelbvieh Balancer	0.11	11.8	2.36
8 Hereford	0.14	10.1	2.69
9 PB Simmental	0.15	11.5	3.22
14 SimAngus	0.15	11.4	2.87
3 Red Angus	0.19	11.6	2.68

SWBTS Junior Bulls: Scanned 2/11/23

	Adj. UFat	Adj. URE	Adj. U%IMF
49 Angus	0.19	12.2	3.39
8 Charolais	0.14	12.5	2.371
5 PB Gelbvieh	0.14	12.3	1.97
1 Gelbvieh Balancer	0.19	11.7	2.58
11 Hereford	0.13	10.0	2.21
18 PB Simmental	0.14	12.7	2.79
20 SimAngus	0.17	12.1	2.82

Pedigree Information: Two-generation pedigree listed for each bull.
Sire - EPDs listed. ACC indicates accuracy which is reflective of the number of progeny recorded.
Dam - EPDs listed. Age indicates age of dam when bull was born. WWR lists number of calves with weaning data recorded and their average weaning weight ratio. Note that all calves may not be included in WWR based on contemporary group structure.

Coat Color & Polled/Horned Genotyping: Simmental, Simmental Hybrid, Gelbvieh, and Gelbvieh Balancer bulls have been genotyped for coat color. Homozygous black bulls are designated as such. Bulls not designated as homozygous black can be assumed to carry a red gene. Bulls genotyped and found to be homozygous polled are designated as such.

EID Number: Each bull has been tagged with an electronic RFID tag. The electronic identification number is provided in the catalog.

Genetic Condition Genotyping: BCIA follows each breed association's policy regarding the testing and reporting of genotypes for genetic conditions. This policy also applies to registration requirements. Genotyping results, as appropriate, are provided in the pedigree documentation of each bull.

Genomically Enhanced EPDs: All bulls have had their EPDs enhanced through the use of genomics (DNA markers, molecular breeding values). Genomic results are incorporated into the computation of the EPDs for several traits, resulting in enhanced EPDs and accuracy values.

Retained Semen Interest: For some bulls, the breeder may elect to retain a semen interest. Bulls affected are designated in the catalog. In all cases, the buyer will have 100% possession and salvage value of the bull. Should the situation arise that the breeder desires to collect semen on the bull, they will be entitled to do so and work with the buyer in a mutually agreed upon manner (at breeder's expense). The buyer will be entitled to their portion of any revenue from semen sold on the bull (portion designated in catalog). Note that only a very small percentage of bulls selling with semen rights retained ever get collected.

Base Price: The base price on all bulls will be \$2500 for Senior bulls and \$2000 for Junior bulls.

MANAGEMENT OF THE YOUNG BEEF BULL

Scott P. Greiner Extension Animal Scientist- Virginia Tech

Management Prior to the Breeding Season

Your newly purchased yearling bull has recently completed a gain test, which provided a high plane of nutrition. Since the completion of the test, the energy level of the diet was reduced and intake limited to prevent excessive fat deposition. The bulls have been managed to be body condition score 6 on sale day. This will give the bull adequate reserves of energy for use during the breeding season. Yearling bulls can be expected to lose 100 pounds or more during the course of the breeding season.

Acquiring a new yearling bull at least 60 to 90 prior to the breeding season is critical from several aspects. First, this leaves ample time for the new bull to get adjusted to the feed and environment of his new home, as well as an opportunity for several new bulls to be commingled for a period of time prior to turnout. Secondly, adequate exercise, in combination with a proper nutritional program, is essential to "harden" these bulls up prior to the breeding season. A facility for the newly acquired bull that allows for ample exercise will help create bulls that are physically fit for the breeding season. The nutrition of the bull will be dependent on body condition. Yearling bulls are still growing and developing, and should be targeted to gain 2.0 to 2.5 pounds per day from a year of age through the breeding season. Bulls weighing approximately 1200 pounds will consume 25 to 30 pounds of dry matter per day. This intake may consist of high quality pasture plus 12 lbs corn, grass legume hay plus 12 lbs corn, or 80 lbs corn silage plus 2 lbs protein supplement. Provide adequate clean water, and a complete mineral free-choice. Prior to the breeding season, all bulls should receive breeding soundness exams (BSE) to assure fertility. Bulls in this sale all passed a BSE. All bulls that are to be used should have a BSE annually. Because a variety of factors may affect bull fertility, it may be advisable to re-test these young bulls before the breeding season even if it has only been a few months since the pre-sale BSE.

Management During the Breeding Season

The breeding season should be kept to a maximum of 60 days for young bulls. This will prevent over-use of the bull, severe weight loss and reduced libido. Severe weight loss may impair future growth and development of the young bull, and reduce his lifetime usefulness. When practical, supplementing young bulls with grain during the breeding season will reduce excessive weight loss.

In single-sire situations, young bulls can normally be expected to breed a number of females approximately equal to their age in months. Using this rule of thumb, a newly purchased bull that is 18 months of age could be placed with 18 cows or heifers. Bulls used together in multiple-sire breeding pastures should be of similar age and size. Young bulls cannot compete with older bulls in the same breeding pasture. A common practice is to rotate bulls among different breeding pastures every 21 to 28 days. This practice decreases the breeding pressure on a single bull. Some producers use older bulls early in the breeding season, and then replace them with young bulls. The appropriate bull to female ratio will vary from one operation to the next based on bull age, condition, fertility, and libido, as well as size of the breeding pasture, available forage supply, length of the breeding season and number of bulls with a group of cows.

All bulls should be observed closely to monitor their breeding behavior and libido to ensure they are servicing and settling cows. Additionally, observe the cowherd to monitor their estrous cycles. Many females coming back into heat may be the result of an infertile or subfertile bull. All bulls should be monitored for injury or lameness that may compromise their breeding capability.

Management After the Breeding Season

Young bulls require a relatively high plane of nutrition following the breeding season to replenish body condition and meet demands for continued growth. Yearling bulls should be maintained in a separate lot from mature bulls, so these additional nutritional requirements can be provided. Body condition and projected mature size of the bull will determine his nutrient requirements during the 9 months following the breeding season. Bulls should be kept away from cows in an isolated facility or pasture after the breeding season. In the winter months, provide cover from extreme weather that may cause frostbite to the scrotum resulting in decreased fertility.

We are once again pleased to offer four high performing Angus bulls in lots 74-77. We would like to thank our past buyers for their support!

- Lot 74: Dam is one of our most consistent cows with him being her fourth consecutive bull calf to make the sale.
- Lot 75: Should put some extra frame and pounds on his progeny.
- Lot 76: Dam has produced test station bulls including the top indexing Jr. in the 2020 BCIA sale.
- Lot 77: His dam goes back to one of our favorite cows of all time. Currently using a full brother as a herd bull with nice results on the ground.

Mike: 276-733-1131
 Mark: 276-733-7913
 Andy: 276-730-5353

LAWSON FAMILY FARMS

HOME OF THE WORLD FAMOUS CHLOES

Great grandam of lots 90&87.

Lawsons Chloe Z341 – Basin Chloe 7T26 x Sitz Upward 307R. This proven high-performance and high-maternal trait cow records a progeny weaning ratio of 120 on five natural calves after earning an individual weaning ratio of 120.

Basin Chloe 7T26 – Basin Chloe 812L x Vermillion Pay weight J847. The foundation Lawson Chloe who earned a progeny weaning ratio of 107 on eight natural calves along with thirteen daughters in production who post a collective progeny weaning ratio of 103 on 27 head. Featuring her valuable progeny and descendants.

Great grandam of lot 85. Dam of lot 87.

Chris Lawson
423-526-8576
276-445-5411
Lawsonfamilyfarms@hotmail.com
www.lawsonfamilyfarms.com

Great grandam of lot 85.

Lawsons Chloe C815 - Lawsons Chloe Z341 x SAV Renown 3439. Selected by Coleman Angus of Montana as the \$15,000 top-selling bred heifer of the 2017 Lawson Family Farms Sale, she went on to earn progeny weaning and yearling ratios of 110 and 108, respectively, on her first three natural calves with six daughter in production who post a collective progeny weaning ratio of 108 on their first calves, and a phenomenal array of top-selling progeny who include: the \$225,000 Coleman Triumph 9145, the \$120,000 Coleman GPS 147, the \$375,000 half-interest Coleman Chloe 9275, the \$150,000 half-interest Coleman Chloe 034, the \$70,000 Coleman Chloe 9274.

Lawsons Chloe 630 - Sold one-half interest to Jeff Stewart from Corbin, KY. Ranks in the top 1% for weaning weight EPD, yearling weight EPD, CW EPD, \$W and \$F; ranks in the top 3% for RADG EPD and SC EPD; ranks in the top 5% for \$B; ranks in the top 10% for MILK EPD. This is a powerful and special attraction female. From the foundation Lawsons Chloe female Basin Chloe 7T26 and sired by the popular Select Sires Deer Valley Growth Fund. Weaned her first natural calf at 712 lbs.

Dam of lot 90.

Lawson's Top Shelf - the \$40,000 1/2 value top selling bull at the 10th Annual Lawson Family Farms production sale. This powerful herd sire presents with elite EPD rankings: CED +2, BW +2.5, WW +98, YW +170, RADG +.32, YH +.7, SC +1.41, MILK +30, MARB +.67, RE +.70, \$W +90, \$F +134, \$B +187, \$C+300, that included a weaning ratio of 118 a natural calf from the second generation Lawsons Chloe Z341 who records a weaning ratio of 120 on five natural calves and is dam to the Great Lawson's Chloe C815. This is a complete Powerhouse bull. I call him a COWBOY kind of bull. AAA#20143295

VIEW/BID LIVE ON THE INTERNET!

YOU'VE EARNED IT

You've made a significant investment in your genetics, but does the market recognize that? The AngusLinkSM Genetic Merit Scorecard was created to objectively describe the genetic merit of your feeder calves. The scorecard gives buyers the confidence they need to pay more for your quality calves.

In 2022, users of the Genetic Merit Scorecard earned a **\$12.94/CWT PREMIUM** on average. Give us a call and we can help you earn what you deserve.

HOW TO PURCHASE BULLS AT THE AUCTION IF YOU CANNOT ATTEND:

1. To Bid via Tel-O-Auction

If you will be unable to attend this sale, you can do your own bidding via a conference telephone hook-up. Buyers interested in this option should call the Virginia BCIA at 540/231-9159 prior to sale day. On sale day, until sale time, buyers should call 540/230-2680 or 540/239-2258. You will be assigned a unique bidder number with which to do your bidding. The sale manager can answer any questions you might have about using the telo-auction system. During the sale, bidders should call 800/309-2350. You will be prompted for an ID number – enter 4505514 followed by the # key. You will be asked to state your name and then you should be connected on the conference line.

2. To Bid Live Via the Internet

We are pleased to offer the 40th Annual Southwest Virginia Performance Tested Bull Sale and BCIA Influenced VA Premium Assured Plus Heifer Sale broadcast “live” over the Internet through Cowbuyer.com.

To watch or bid online, simply complete the following steps:

- View/bid online in Real Time
- Registration is required. Please register at least one (1) hour prior to sale time at www.cowbuyer.com
- High Speed Internet is required. Slower speed will not permit you to bid and keep pace in real time.
- Terms: Purchasing online constitutes a legal contract and promise for payment of purchases. All purchases must be paid within ten (10) days of sale date and prior to load out or delivery of cattle purchased.
- Cowbuyer.com is a service provider and is not responsible for the activity or inactivity of any technology, internet connection at the sale site or connection and technology of the bidders.
- For questions or information, contact: Aaron Ray Tompkins – 336/363-4639, atompkin@vt.edu
- After the sale, please contact Dr. Scott Greiner at 540/230-2680 to make arrangements for payment and delivery of your online purchase.

You can also watch and bid on the sale via your Apple or Android device. Simply visit your app store and look for Cowbuyer Live Bidding App and download to your device, or click on the logo once you have logged into your account. You must first register for an account through Cowbuyer.com.

For General Questions or Technical Trouble, please contact Aaron Ray Tompkins – 336/363-4639, atompkin@vt.edu.

3. Absentee Bids

Please call Dr. Scott Greiner at 540/230-2680, and we will be happy to work with you to place your bids.

TERMS & CONDITIONS

Except for those stated in the below terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction. The warranties and guarantees set forth in the “Terms and Conditions” are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

BIDDING: Each animal will be sold to the highest bidder. The person in charge will settle any disputes as to bids and his decision on such matters shall be final.

TERMS: Terms of the sale are cash, unless satisfactory credit arrangements have been established prior to the sale. All settlements are to be made with the clerks of the sales immediately following the conclusion of the sale and before any cattle will be released from the sale premises.

PURCHASER'S RISKS: Each animal becomes the risk of the purchaser as soon as sold, but it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

REGISTRATION CERTIFICATES: A transferred certificate of registry will be furnished to the purchaser for each animal within 45 days following date of sale or receipt of full payment.

HEALTH: All animals are eligible for interstate shipment, except as otherwise announced. Interstate health papers will be furnished for each animal requiring T.B. and Bangs tests in accordance with Federal Regulation.

ANNOUNCEMENTS: Any changes from information of any kind in this sale book will be announced from the auction box and such announcements shall take precedence.

BULL GUARANTEE: All bulls sold are guaranteed, via written contract between BCIA and the seller, to be breeders. Guarantee will be applicable to bulls which prove to be infertile, have structural soundness problems (including foot soundness), or have other issues which apply under a good-faith

guarantee. Any bull that settles a reasonable number of healthy cows shall be considered a breeder. This guarantee is contingent upon the buyer providing proper management prior to, during, and after the breeding season. Proper management shall include appropriate nutrition, breeding management (bull to female ratio appropriate for bull's age, not commingling yearling bulls with mature bulls in same breeding pastures, proper observation of bulls during breeding season, etc.), and animal health care.

CLAIMS FOR REFUND OR ADJUSTMENT: All claims for refund or adjustment in the event the bull is a non-breeder due to infertility or unsoundness must be made in writing by end of first breeding season but not later than 12 months following the sale. It shall be the responsibility of the buyer to prove the animal is a non-breeder. A veterinarian's report on the causation of the bull being a non-breeder is required. If the bull proves to be a non-breeder, the seller shall be entitled to provide the buyer one of the following: a) full refund for the purchase price, b) replace the bull with another of equal value, or c) issue credit to the buyer redeemable at a future BCIA bull sale. The seller shall be entitled to any salvage value.

RIGHTS AND OBLIGATIONS: The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

All persons who attend the sale do so at their own risk. Neither Virginia BCIA, the Virginia Cattlemen's Association, the Bull Test Station or its management, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise.
